

Specialized Transition Cow and Calf Products

Targeted Solutions for Optimal Health: A prerequisite for dairy profitability is maintaining the health and welfare of the herd. ADM provides a diverse portfolio of products along with the expertise to help meet this important objective from birth through lactation.

Product Portfolio

A successful lactation begins with a smooth transition from dry period to freshening. Astute management and nutrition is essential. ADM provides numerous products to provide the nutritional balance required for the pre-fresh cow and her calf.

- **Transition Starter Pak III** – 1-1.5 lb/hd/day; provides glucose precursor, sugars, Proponse® yeast, CitriStim®, and natural flavor.
- **Transition Starter Pak III with Selenium Yeast and Rumensin®***
- **ReaShure®*** provides a source of rumen stable encapsulated choline chloride, which is beneficial in fat transport and metabolism.
- **ADM Natural-Source Vitamin E** provides natural vitamin E source defined by the Association of American Feed Control Officials (AAFCO) as having biopotency 1.36 times greater than synthetic vitamin E, providing a highly bioavailable source of this critical antioxidant.
- **Milk Bridge®*** provides added protein and energy supplementation to pasteurized milk.
- **Calf Insure** contains a source of live, naturally-occurring microorganisms and provides specific bacteria that help support a healthy gastrointestinal tract; specifically for calves.
- **Calf Ally®* E-Lyte** provides energy supplementation with electrolytes; a product option containing a gelling agent is also available (Calf Ally® E-Lyte Gel).
- **Calf Ally®* Colostrum Replacer**, an industry leader in colostrum replacement.
