ADM

PRO-VITA-MIN™ 20-5 Tub provides the necessary protein, minerals, and vitamins to complement forages and grains, enabling horses to reach their performance potential. It is an ideal product for meeting nutrient needs under situations that make it difficult to individually supplement horses on a daily basis, such as with pasture or range conditions. It is a good choice for supplementing free-choice to mature horses on pasture or range. Also, it helps meet nutrient needs of yearlings, two-year olds, gestating broodmares, and lactating broodmares.

## PRO-VITA-MIN 20-5 Tub

*A Free-Choice Supplement for Horses on Pasture*

**Product Form/** 100 lb tubs (11228AAA6G)  
**Packaging** 200 lb tubs (11228BL)

**How Much is Needed** 1-2 lb per horse daily

**Feeding Instructions** Feed GROSTRONG® PRO-VITA-MIN 20-5 Tub free-choice to horses on pasture or roughage rations. Make sure animals have adequate pasture or roughage available and are not starved for salt or minerals. Feed GROSTRONG PRO-VITA-MIN 20-5 Tub continuously. Place tubs in pastures near areas frequented by horses, such as watering locations, shade or loafing areas. Place one tub for every 5 horses and place tubs far enough apart to prevent dominant horses from controlling more than one tub. Consumption may vary depending on number of horses per tub, climate, grazing conditions, condition of horses and/or availability of other feeds. In situations where climate and/or other factors result in consumption other than desired, intake of supplement can be increased or decreased by adding or reducing tubs per pasture. Provide adequate forage and supplemental feed as needed to maintain the desired body condition. Provide free access to fresh, clean water at all times.
