MoorMan’s® ShowTec®

Show Chicken

Helping our exhibitors gain the competitive edge through superior feed technology.

Winners are bred . . . Champions are fed.SM

Championship results with MoorMan's ShowTec Show Chicken!

Cade Shepherd
2016 Ozark Empire Fair
Gold Buckle Gala
Grand Champion Broilers

Hayden Duncan
2016 Missouri State Fair
Grand Champion
Market Pen of Chickens

Vivian Buie
2016 Missouri State Fair
Reserve Champion
Market Pen of Chickens

Brayden Gast
2015 Missouri State Fair
Reserve Champion
Market Pen of Chickens

MoorMan’s ShowTec Chicken Feed AMP/BMD No. 70739ACF

MoorMan’s ShowTec Chicken Feed is a complete chicken feed and is designed to provide essential nutrients that show chickens (broilers, layers, and breeders) need to excel at shows. Critical nutrients are supplied for fast, efficient growth and development of muscle mass for broilers and sound structure and body mass for quality egg laying ability. It provides 30% protein, 4.5% fat, and maximum of 5% fiber.

Select ingredients, consistent formulation
Ensures product consistency and dependable nutrient sources.

High-quality, multiple protein sources and synthetic amino acids
Provides the critical amino acids needed by show chickens for lean muscle growth, egg laying, and feathering.

Energy from high-quality sources
Ensures energy needs are met for efficient production.

CitriStim® (prebiotic)
An ADM proprietary feed ingredient which is a multi-component, functional, whole-cell, inactivated yeast (Pichia guilliermondii). Research shows the components of CitriStim may help create a healthier gastrointestinal tract environment which leads to better efficiency.

Multiple direct fed microbials (probiotic)
Direct fed microbials help maintain proper microorganism balance in the gut, leading to more efficient utilization of feedstuffs.

Mineral and vitamin fortification
Provides minerals and vitamins necessary for optimum growth, development, reproduction, and immune function, which is vital to good health. Research shows natural-source vitamin E is more bioavailable compared with synthetic vitamin E. Vitamin E functions as an antioxidant and is important to immune function.

Selenium yeast
More bioavailable selenium source. Selenium is important to immune function.

Complexed (organic) zinc
More readily available for absorption compared to inorganic sources of zinc. Zinc is important for immunity, reproduction, skin and claw integrity, muscle development, and eggshell quality.

Marigold extract
Natural pigment used for deep skin, shank, beak, and yolk color enhancement; also contains compounds with vitamin A activity.

Phytase
Effective in increasing utilization of phosphorus from plant sources which reduces amount of supplemental phosphorus needed in the ration and reduces excretion of phosphorus into the environment.

Medicated with amprolium and bacitracin
Promotes growth and feed efficiency; helps develop active immunity to coccidiosis.

Crumble form, 50-lb bag
Ensures show chickens receive balanced nutrition (no sorting of ingredients) and reduces feed waste.
