

# Pen Pals® Professional Rabbit Feeds

Whether your goal is champion rabbits or producing top-notch commercial rabbits, look to the proven manufacturer of show feed . . . ADM Animal Nutrition™ for Pen Pals Professional Rabbit Feeds—complete, mini-pelleted feeds ideal for show and commercial rabbits of all life stages.

**Professional Show Rabbit (81657AAA)** — A 16% protein, 3.5% fat, & 17.5%–22.5% fiber, alfalfa-based, specially fortified feed for show rabbits. It is beneficial for rabbits under stress, such as show rabbits, and the fiber level is especially advantageous for smaller-sized show rabbits.

**Professional Rabbit 18 (80033AAA)** — This 18% protein, 3% fat, & 16%–19.2% fiber, alfalfa-based feed is specially fortified for rabbits requiring a higher nutritional level, such as does producing six or more litters yearly, show rabbits, fryers grown for maximum rates of gain and feed efficiency, Angora and other fiber-producing breeds, and rabbits in stressful environments.

**Professional Rabbit 16 (80034AAA)** — This 16% protein, 3% fat, & 17%–21% fiber, alfalfa-based feed is specially fortified for use by the commercial rabbit breeder, show competitor, or those who just enjoy rabbits.

## What you can expect from Pen Pals Professional Rabbit Feeds . . .

- High-quality, dependable, nutritionally complete and balanced products with consistent formula; no need to supplement with additional nutrients
- Alfalfa-based feeds provides fiber for proper digestive tract function
- Amino acid balanced for better growth, reproductive function, and fur quality
- Supply vegetable oil and soy hulls for easily digestible energy
- Direct fed microbial to help support digestibility and nutrient availability
- CitriStim®, an ADM proprietary feed ingredient that may favorably impact the gut microbial population
- Thermal Care™, a patent-pending technology that utilizes unique, specially selected, research-tested compounds proven to help animals cope with heat stress
- Proresponse™ yeast for enhanced feed palatability, digestibility, and hindgut fermentation
- Contain sarsaponin (Yucca) to help alleviate ammonia levels
- Vitamin/mineral fortification; proprietary premix is specifically formulated for rabbits; proper mineral and vitamin levels are essential for a vast array of body functions and good health; also includes complexed trace minerals which are more readily available compared to inorganic mineral sources which is a plus for rabbits under more stressful conditions such as exhibition
- Provide salt; eliminating need for salt spoons
- No corn formula reduces concern of aflatoxin and excess starch to the hindgut
- \* Do not contain animal products
- Mini-pellet form helps reduce feed waste and ensures consistent nutrition with every nibble

## Additional features of Professional Show Rabbit Feed (81657AAA) . . .

- PremiDex™, an ADM proprietary feed ingredient which functions as a prebiotic to help support healthy digestion
- Provides natural-source vitamin E which research shows is more bio-available compared to synthetic vitamin E. This is especially critical for rabbits under stress as vitamin E protects body tissue from oxidative damage and is vital to immune system function.
- Stabilized rice bran, a highly digestible energy source to help support body and fur condition
- Omega Flax™ for Omega 3, an essential fatty acid
- Also available in 5-lb bag
