Pen Pals®
Rabbit Pellets
A Complete Feed for Growing and Breeding Rabbits

Product Positioning
Rabbit Pellets provide 15% protein in an alfalfa-based, complete rabbit feed suitable for the average rabbit.

Features
Nutritionally complete and balanced
Consistent product formula
Provides high-quality protein sources
Provides salt
Provides direct fed microbial
Provides sarsaponin (Yucca)
All high-quality ingredients
High and consistent palatability
Vitamin/mineral fortification
Provides complexed trace minerals
Mini-pellet form

Benefits
Nutritionally complete and balanced to meet needs of growing and breeding rabbits. No additional sources of protein, energy, vitamins, or minerals are needed.
Ensures product is consistent from one production run to the next; nutrition and palatability would otherwise be compromised. High-quality alfalfa-based feed provides the rabbit with high-quality fiber needed for proper functioning of the digestive tract and ensures good palatability.
Ensures amino acid needs are met for growth and reproduction.
Eliminates need for salt spoons, which may corrode cages.
Aids in digestibility and nutrient availability.
Helps reduce ammonia levels.
Strict selection of high-quality ingredients and manufacturing quality control procedures ensures product contains only high-quality ingredients beneficial to the nutritional status of rabbits.
Nutritional adequacy combined with great palatability ensures rabbits will consume needed nutrients.
Proper mineral and vitamin levels are essential for a vast array of body functions and good health. An improperly formulated diet predisposes rabbits to low levels of productivity and poor health.
Complexed mineral sources are more readily available compared with inorganic sources, which could be crucial to stressed rabbits.
Reduces waste and ensures consistent nutrition with each bite.

Product Form
Mini-pellet form, 50 lb bags (80036AAAE4).

Guaranteed Analysis
Crude Protein, min. ............ 15.0%
Crude Fat, min. ............... 2.5%
Crude Fiber, min./max. ...... 17.5-21.0%
Calcium (Ca), min./max. .... 0.9-1.4%
Phosphorus (P), min. ....... 0.4%
Salt (NaCl), min./max. ...... 0.7-1.2%
Vitamin A, min. ............ 2,000 IU/lb

Ingredients
Dehydrated Alfalfa Meal, Dried Eggshell Meal, Corn Malt Dextrin, Soybean Meal, Bluegrass Meal, Wheat middlings, Cane molasses, Cottonseed Hulls, Citric Acid, Dicalcium Phosphate, L-lysine HCL, Sodiuym Selenite, Copper Oxide, Manganese Oxide, Zinc Oxide, Chlortetracycline, Dehydrated Alfalfa Meal, Dehulled Soybean Meal, Wheat Middlings, Soybean Hulls, Cane Molasses, Vegetable Oil, Lactobacillus acidophilus Fermentation Product Dehydrated, Lactobacillus casei Fermentation Product Dehydrated, Bifidobacterium thermophilum Fermentation Product Dehydrated, Enterococcus faecium Fermentation Product Dehydrated, DL-Methionine, Yucca Schidigera Extract, Calcium Carbonate, Salt, Zinc Oxide, Vitamin E Supplement, Zinc Amino Acid Complex, Copper Sulfate, Manganous Oxide, Ferrous Sulfate, Manganese Amino Acid Complex, Copper Amino Acid Complex, Cobalt Gluconate, Sodium Selenite, Iron Amino Acid Complex, Vitamin A Supplement, Niacin Supplement, Vitamin B12 Supplement, Menadione Sodium Bisulfite Complex, Vitamin D3 Supplement, Biotin, Calcium Pantothenate, Riboflavin Supplement, Magnesium Amino Acid Chelate, Calcium Iodate, Thiamine Mononitrate, Pyridoxine Hydrochloride, Cobalt Carbonate, Folic Acid, Choline Chloride
Feeding Instructions

Feed to growing and breeding rabbits. Feed requirements depend on the size, breed, and stage of growth, use, or production.

*Self feed the doe during this period.

**For young rabbits, we suggest self-feeding for most economical gains.

Provide clean, fresh water at all times.

**WARNING:** This product is not intended for laboratory or research animals. No expressed or implied guarantee as to suitability for that purpose is made.

**REMINDER:** Feed is perishable. Store this product in a cool, dry area away from insects.

Additional Information

Feed requirements are based on medium-sized breeds. Adjust for smaller or larger breeds.

Overfeeding is a common problem with rabbits. Does’ fertility and kindling problems increase if overweight. Proper condition should be the determining factor in choosing whether self-feeding or limit-feeding (hand-feeding) is most proper and profitable, except for lactating does and growing bunnies that must be self-fed. Limit-feeding is the preferable method of feeding breeding rabbits (resting and gestating does) to ensure proper body condition is maintained. When limit-feeding, feed rabbits the same number of times each day and at the same time each day. The number of feedings daily is a matter of preference.

Rabbits should always be changed slowly from one feeding program to another (over a five to seven day period), mixing new food gradually with old food. This allows the rabbit to adjust to the new food source.

NEVER add oats, straw, barley, or other foodstuffs to the rabbit feeding program unless properly advised by a competent nutritionist. This will dilute the intake of nutrients in the Pen Pals Rabbit product and could depress rabbit performance. Surroundings should be kept clean and free of dirt and parasites.
