

Forage First[®] Summer Care

A supplement for working horses to provide nutritional support for heat abatement

Note: Contains capsicum, which has been known to test in performance horses.

Product Number: 81885AAA

Regardless of your discipline, summer is a great time to enjoy your equine companion. However, it also presents unique challenges such as high ambient temperatures, flies, and other physiological challenges associated with heat. Therefore, our nutritionists developed Forage First Summer Care, a unique supplement specifically formulated to help support your horse through the hot summer months.

Forage First Summer Care's low feeding rate and advanced nutrition delivers an economical means to help facilitate good health in the hot summer months.

Forage First Summer Care contains a concentrated source of unique ADM ingredients designed to nurture wellness.

Features

Benefits

Thermal Care[™]

Patent-pending technology which utilizes encapsulated plant extracts to help alleviate some of the physiological and health challenges associated with heat stress.

CitriStim[®]

An ADM proprietary feed ingredient that is a proven, truly unique whole-cell inactivated yeast (*Pichia guilliermondii*). CitriStim may help the animal strengthen its defense against health challenges by supporting and optimizing gut function, gut integrity, and body defense responses, strengthening production. CitriStim provides proven benefits.

Garlium

Garlium is formulated from naturally-sourced garlic extracts to create a highly concentrated form of garlic. It is standardized to guarantee accurate concentration of flavoring compounds. The production process enhances stability and shelf life of the flavoring compounds. Every production lot is validated using HPLC technology to ensure the highest quality.

Cell Rate[®]

Cell Rate is known to be a source of nucleotides. Nucleotides, the building blocks of RNA and DNA, are required for cell replication involved in maintenance, growth, and repair of body cells.

Highly palatable

Horses will readily consume product.

Product Form/Packaging

Pellet form: Top-dressed on feed.

Tub form: Feed free-choice to horses on pasture or roughage rations.

Pellet form in 3.75-lb pouch (81885AAA2G); 11.7-lb pail (81885AAA5G)

Tub form in 100-lb (81885AAA6G)

Guaranteed Analysis: 81885AAA Pellet

Crude Protein	(Min)	11.0 %
Crude Fat	(Min)	1.0 %

Feeding Directions: Pellet (81885AAA2G and 81885AAA5G)

Feed 2 oz per head daily either top-dressed or mixed with other feeds. Scoop included holds approximately 1 oz. Forage First® Summer Care is **not a complete feed**; therefore, additional feed should be provided to meet the animal's nutrient requirements. Provide clean, palatable water at all times.

Note: Contains capsicum, which has been known to test in performance horses.

Feeding Directions: Tub (81885AAA6G)

Feed Forage First Summer Care Tub free-choice to horses on pasture or roughage rations. Make sure animals have adequate pasture or roughage available and are not starved for salt or minerals. Feed Forage First Summer Care Tub continuously. Place tubs in pastures near areas frequented by horses, such as watering locations, shade or loafing areas. Place one tub for every 5 horses and place tubs far enough apart to prevent dominant horses from controlling more than one tub. Consumption may vary depending on number of horses per tub, climate, grazing conditions, condition of horses and/or availability of other feeds. Horses should consume 1 to 2 pounds per horse daily. In situations where climate and/or other factors result in consumption other than desired, intake of supplement can be increased or decreased by adding or reducing tubs per pasture. Provide adequate forage and supplemental feed as needed to maintain the desired body condition. Consult with a veterinarian or ADM nutritionist for a recommended diet. For more information, visit www.ADMequine.com Provide free access to fresh, clean water at all times.

CAUTION: Consumption of this product by sheep and goats may result in copper toxicity. Follow label directions. Feeding added selenium at levels in excess of 0.3 ppm in the total diet is prohibited.

NOTE: Contains capsicum, which has been known to test in performance horses
