## **ADM Animal Nutrition Enters Global Omega-3 Fatty Acid Market with DHA Natur™**

CHICAGO, June 6, 2016—ADM Animal Nutrition™, a division of Archer Daniels Midland Company (NYSE: ADM), is revolutionizing the aquaculture market with a new, highly-concentrated source of Omega-3 fatty acid, DHA Natur™.

DHA Natur is a dried algae biomass rich in docosahexaenoic acid (DHA). This new source of DHA provides the aquaculture industry with a viable alternative to fish oil sourced from commercially-reared and wild-captured fish. The world's fish stock, the current global source for fish oil, is depleting. This depletion, coupled with increased costs and a growing demand for Omega-3 as a dietary supplement, has made the creation of an alternative Omega-3 fatty acid source a crucial need for the industry.

“ADM Animal Nutrition has reached a significant milestone by bringing to the market a sustainably-produced, microalgae product, DHA Natur™,” said Peter Bergstrom, international business manager for ADM Animal Nutrition. “The market interest for an alternative source of DHA is significant, and we are currently scaling up production to meet the increasing demand.”

DHA Natur is a highly-concentrated, vegetable source of DHA. It is derived through a controlled fermentation process utilizing ADM's micro algae-based technology that allows heterotrophic algae to be produced more efficiently than phototrophic algae. DHA Natur is comprised of 17-20 percent (as-is basis) DHA and is a high-quality meal product. DHA Natur is currently approved for use in the European Union, Chile, Australia and New Zealand with plans to secure regulatory approval in the U.S. and Canada in the near future.

For more information on DHA Natur, contact ADM Animal Nutrition at 800-775-3295, [AnimalNutrition@adm.com](mailto:AnimalNutrition@adm.com) or visit [www.adm.com/SpecialtyIngredients](http://www.adm.com/SpecialtyIngredients).

### **About ADM Animal Nutrition**

ADM Animal Nutrition is a leading manufacturing, nutrition and marketing business offering a wide range of innovative products for the animal nutrition market. Known as a global leader in amino acids, ADM Animal Nutrition also offers consistent, high-quality feed products, supplements, premixes, custom ingredient blends and specialty feed ingredients designed to provide leading-edge solutions, enabling our customers to meet and optimize animal health and nutrition goals.
