

viable fish oil alternative

DHA Natur™ is a highly concentrated vegetable source of DHA, an essential Omega-3 fatty acid. It is derived through a controlled fermentation process. ADM's proprietary strains of heterotrophic algae are extremely efficient in the production of DHA.

- Source of the nutritionally indispensable fatty acid DHA
- A constant supply of a high-quality nutrient with minimal variability over time
- A proven alternative to fish oil that does not rely on wild captured fisheries
- A naturally concentrated source of DHA, with higher DHA density than any fish oil
- ADM's high quality standards
